

# COA

## Cellopoint Online Archiving

COA is a cloud-based email archiving solution that archives emails securely and ensures quick search and retrieval of emails by simply configuring journaling rules. It also features indexing, compression, encryption, and e-discovery functionality. COA helps organizations to stay compliant, reduce storage costs, and optimize data management.

- 1.1 Effectively archives emails from cloud email servers like Exchange Online, Microsoft 365, or Google Workspace.
- 1.2 Effectively archives emails from on-premises email servers like Microsoft Exchange.
- 2.1 COA VM is the main system responsible for effectively archiving emails by indexing, compressing, and encrypting. It also offers a user-friendly web console for administrators to manage archived emails.
- 2.2 Cloud storage offers on-demand scalability, high stability, reliable data protection, and cost-effectiveness.
- 3 Enables fast search and retrieval of emails and provides role-based security controls.
